

# User stories for E-restaurant project

## Superuser

- As a super user, I want to login so that I can have an access to declared functionality.
- As a super user, I want to create new users with proper access rights so that they can execute their duties and have different rights.
- As a super user, I want to activate/deactivate users so that dismissed employees cannot enter the system.
- As a super user, I want to edit users so that promoted employees can have wider rights.
- 

## Administrator

- As an administrator, I want to login so that I can have an access to declared functionality.
- As an administrator, I want to add new dishes to the menu so that I can make the menu bigger (+mark kitchen-made or non-kitchen-made).
- As an administrator, I want to activate/deactivate dishes from the menu so that I can make the menu smaller (include conditions for deactivating whilst someone has ordered it).
- As an administrator, I want to edit categories of dishes so that users can filter dishes by type.
- As an administrator, I want to edit existing dishes in the menu so that I can change the components.

## Customer

- As a customer, I want to make an order anonymously so than I can skip authorization.
- As a customer, I want to add dishes to my order so that I can see the whole order list.
- As a customer, I can enter sending address so that I can ship order to an address.
- As a customer, I want to submit my order so that I can complete an order and wait the delivery.
- As a customer, I want to register account (and enter my details) and login so that I can make an order.
- As a customer, I want to delete dishes from my order so that I can cancel unnecessary dishes.
- As a customer, I want to filter the menu by categories so that I can easily select the proper dish.
- As a customer, I want to change number of dishes in my order so that I can order a few item samples of same item.

## Kitchen staff member

- As a kitchen staff member, I want to login so that I can continue working.
- As a kitchen staff member, I want to mark the dish done in the kitchen pending list so that I can show the work I'm working on (two separate buttons – in progress/done+block transaction when cook works on the dish + when the dish is done check of order is done. Yes – to shipping, No - wait).

## Delivery responsible

- As a delivery responsible, I want to login so that I can continue working.
- As a delivery responsible, I want to ship orders to the customer so that the order will be completed.
- As a delivery responsible, I want to change status of order ('ready for shipment' -> 'delivering' -> 'delivered') so that I can mark processed orders.
- As a delivery responsible, I want to filter the delivery pending list by status of orders so that I can easily see the list of unprocessed orders.

## Business analyst

- As a business analyst, I want to login so that I can continue working.
- As a business analyst, I want to see the report with information about client orders (order counts and order sums) during given time period so that I can measure the efficiency of work.
- As a business analyst, I want to see the report with information about client orders by menu item categories so that I can measure the efficiency of work (built a graph).

- ✓ Graph for analyst
- ✓ 2 buttons 'in progress'/'done' for cook
- ✓ Block transaction while dish at work for cook
- ✓ Methods for check if order is done (T-shipping/F-wait)for cook
- ✓ Check is someone ordered dish before administrator deactivate it
